
Plan Overview

A Data Management Plan created using DMPonline

Title: God and Diversity: Appropriating Abraham Kuyper to Religious Pluralism in Indonesia

Creator: David Kristanto

Affiliation: Vrije Universiteit Amsterdam

Template: VU DMP template 2021 (NWO & ZonMW certified)

ORCID ID: 0000-0002-8422-5738

Project abstract:

Even though religious freedom is constitutionally guaranteed in Indonesia, the condition of religious pluralism in the country is not without problem. The government has been actively defining what is the meaning of religion, differentiating religion and beliefs, and making few religions as official religions of Indonesia. In that context, the freedom of religion seems to be much more limited, especially for the communities of indigenous religions, whose religions are not officialized by the state. Abraham Kuyper might be relevant to this context. How he fought for freedom for all in the 19th century Netherlands could inspire civil rights movements to fight for freedom for all, and some of his thoughts might bear fruitful theological reflections that are applicable in the context of religious pluralism in Indonesia.

Project title

God and Diversity: Appropriating Abraham Kuyper to Religious Pluralism in Indonesia

Project summary

Even though religious freedom is constitutionally guaranteed in Indonesia, the condition of religious pluralism in the country is not without problem. The government has been actively defining what is the meaning of religion, differentiating religion and beliefs, and making few religions as official religions of Indonesia. In that context, the freedom of religion seems to be much more limited, especially for the communities of indigenous religions, whose religions are not officialized by the state. Abraham Kuyper might be relevant to this context. How he fought for freedom for all in the 19th century Netherlands could inspire civil rights movements to fight for freedom for all, and some of his thoughts might bear fruitful theological reflections that are applicable in the context of religious pluralism in Indonesia.

Your contact details

Please provide the following details: David Kristanto

Your role in the project (please refer to the [CRediT](#) contributor roles): Data Manager, Principal Investigator

Telephone number: +6281281205853

Email: kristantodavid27@gmail.com

ORCID ([LibGuide](#)): 0000-0002-8422-5738

University: Vrije Universiteit Amsterdam

Faculty/Institute: Faculty of Religion and Theology

Department/Research Group: Religious History and Heritage

Please list the other people involved in this project

N/A

Funding organisation & grant number (if applicable)

N/A

Project code (if applicable)

N/A

Consulted data management expert(s)

Name: Jolien Scholten
Email: j2.scholten@vu.nl
University / partner organisation: VU Amsterdam

Date of consultation: 07 / 04 / 2022

1. Data description

Will you collect and/or process personal data in this project?

- No

Will you use existing data? If yes, what is their source?

Name source: books, journals, conference proceedings, newspaper articles, PhD theses

Will you collect or produce new data? If yes, please describe how.

N/A

What kinds of outputs will you produce in this project? Please describe these data assets.

Raw data: None

Processed data: Conference Proceedings

Data asset: published proceedings

Description: publications of my presentation draft in international seminar

Format: PDF

Analyzed data: Study Notes

Data asset: research data from the early stage

Description: collection of reading reflection

Format: PDF

Other: None

Research documentation: N/A

Analysis software: N/A

How much digital data storage will your project require?

- 0 - 50 GB

Will you collect physical data? If yes, please describe these.

N/A

Will you take measures to ensure data quality? Please describe these, if applicable.

N/A

2. Legal and ethical requirements, codes of conduct

What legislation applies to your research project? Please tick the relevant boxes for your project.

N/A. My research will be based on published theological and historical sources.

Do you require approval of an ethical committee for this project? If yes, please indicate which ethical committee and whether you have obtained approval for this project.

- No

N/A

Will you work with data for which intellectual property and/ or confidentiality are an issue? If yes, please describe.

- No

Since I use only sources that has been published, they are not confidential documents. On the matter of intellectual property, citation should be done appropriately to avoid plagiarism.

Do you plan on generating a marketable product from your research project? if yes, please describe

- No

N/A

3. Storage and back-up during the research process

What measures will you take to secure and protect data during the research process? Please describe, for each separate data asset you described for question 1.5, how you will ensure data security, where the data assets are stored & backed up, and who has authorization to access the asset.

Raw data: None

Data asset: N/A

Storage: N/A

Backup: N/A

Access: N/A

Security measures: N/A

Processed data: Conference Proceedings

Data asset: publications of presentation draft

Storage: the publisher's repository, mostly open-journal system
Backup: N/A
Access: open access
Security measures: N/A

Analyzed data: Study Notes

Data asset: data from early research
Storage: laptop drive
Backup: google drive
Access: limited to personal use
Security measures: email password

Is it necessary to transfer the (physical or digital) data assets to other locations or research partners? If yes, please describe how you secure the file transfer.

- No

4. Data archiving and publishing

Which data assets will be archived and which will be published?

Presentation draft (as conference proceedings)
Study notes or reading reflections from the early research (could be journal articles)

Where will you archive your data assets?

If it is published, it will be archived in the publisher's repository.
If it is not published, I will keep it in my laptop's drive or google drive.

For how long will the data be available in the archive?

If it is published, it depends on the publisher. But generally, it is more than ten years.

Where will you publish your data assets?

theological journals, international conference proceedings.

How will you ensure your data assets get a persistent identifier (e.g. a DOI-code)?

By publishing it under an open-access system. Open-access journal generally have DOI code.

Will you register your datasets in an online registry other than PURE? If yes, where?

N/A

Are there restrictions to data publishing? If yes, please specify the reasons and list the data assets you do not wish to share publicly.

N/A

When will you share the data? If not immediately after completion of the project, please specify the reasons.

Immediately after the project is complete.

Please indicate the license and/ or terms of use under which you share your data.

creative commons

5. Documentation

What documentation and metadata will accompany the project?

theological journals in an open access system

What metadata and documentation will accompany the data assets?

Metadata in theological journals include author, author's institution, abstract, keywords, correspondence e-mail.

What methods, software or hardware are needed to access and use your data?

pdf viewer, internet browser, pc/laptop

6. Data management responsibilities and resources

Who will be responsible for management of the data assets during the project? Please specify their name, position, role in the project, and faculty/ institution/ group.

Please provide the following details: David Kristanto

Your role in the project (please refer to the [CRediT](#) contributor roles): Data Manager, Principal Investigator

Telephone number: +6281281205853

Email: kristantodavid27@gmail.com

ORCID ([LibGuide](#)): 0000-0002-8422-5738

University: Vrije Universiteit Amsterdam

Faculty/Institute: Faculty of Religion and Theology

Department/Research Group: Religious History and Heritage

Who will be responsible for management of the data assets after completion of the project (e.g. the project lead/ dedicated data manager/ department head)? Please specify their name, position, role in the project, and faculty/ institution/ group.

After my dissertation is completed, the Faculty of Religion and Theology at the VU University will be responsible for the data management of my research.

For data that are only available upon request, what methods will be used to handle requests for access and how will data be made available to those requesting access?

Yes.

What resources (for example financial and time) will be dedicated to research data management? Please estimate their cost.

100 Euros. The price to store the data in google drive is free and the publishing cost in Indonesian Theological Journal (open-access) is approximately around 30 euros for one article. 100 Euros would cover three article publications.
